## COLLECTION "CREATIVE DREAMS"

Decoflux in partnership with Lithuanian graphic artist

Milena Grigaitiene represents high quality exclusive bedding collection with a long creative story - art in different way.

It's a gentle correlation between old crafts and modern design textile. This is about bedding that does not want to be covered.

Enjoy your creative sleep!

## DECOFLUX

From our very first home textiles collection, the thing we have learned about our customers is that they love to be Natural, Charming, Stylish and Smart. They value quality and comfort in every day life.

Thus our team has invited international designers to enrich our collections with a variety of different colours and patterns, to create a special feeling and new experience of home textiles, to promote good taste and a sense of style.

We want to help our customers to live in a more stylish way, enjoying the new cosines of their homes and sharing their inspiration with others.

Our customer satisfaction is built on the high quality and design concept of our products. We offer them exceptionally high quality fabrics: Bed Linens made of 100% combed cotton satin with easycare finishing, washed linen and cotton percale, blankets of merino wool and lamb's wool, pure wool, cotton or artificial fibers.

Decoflux Cushions and Table linen are very special and created for the Love of Art. The paintings and the graphic works of famous Lithuanian artists are transferred onto contemporary and decorative home textiles, mostly cotton and linen. We are successful in applying a special technique for transferring graphic art onto fabric. Only top quality materials are selected for our products that can withstand a daily use and create an uplifting decor for your home.

## THE ARTIST

Milena Grigaitienė is a professional graphic artist with a master's degree of arts, participates in worldwide exhibitions, contests and is always looking for the new expressions of graphic. The artist is a member of Lithuanian Design Forum and Lithuanian Graphic Design Association.

"The most important purpose of my activity is the balance between creativity and logic, inspiration and rationality, art and design".

The moment of unexpectedness is what makes the artist curious. "In graphic, you never know what the final result will look like," Milena says. "One could easily call my work monochromatic wasn't it the blue... blue inspires me and i always work with the intention of inspiration. Blue is just like the first sprout, the beginning of my creation. Sometimes it disappears during the process, but I believe that the energy stays there."

The many-layered process of creation seems magical. Milena uses traditional graphic art techniques (e.g. drypoint) in a mix with old photo art techniques (e.g. cyanotype). "It enables me to draw the blue into graphic. It also creates the feeling of freedom and easiness," the artist says.
