# OUR STORY

---

From our very first home textiles collection, the thing we have learned about our customers is that they love to be Natural, Charming, Stylish and Smart. They value quality and comfort in every day life.

Thus our team has invited international designers to enrich our collections with a variety of different colours and patterns, to create a special feeling and new experience of home textiles, to promote good taste and a sense of style.

We want to help our customers to live in a more stylish way, enjoying the new cosiness of their homes and sharing their inspiration with others.

Our customer satisfaction is built on the high quality and design concept of our products. We offer them exceptionally high quality fabrics: Bed Linens made of 100% combed cotton satin with easycare finishing, washed linen and cotton percale, blankets of merino wool and lamb's wool, pure wool, cotton or artificial fibers.

Decoflux Cushions and Table linen are very special and created for the Love of Art. The paintings and the graphic works of famous Lithuanian artists are transferred onto contemporary and decorative home textiles, mostly cotton and linen. The authenticity of the watercolour hues is fully preserved in digital prints. We are successful in applying a special technique for transferring graphic art onto fabric. Only top quality materials are selected for our products that can withstand a daily use and create an uplifting decor for your home.

We are introducing the Avant-Garde collection. This collection is a glance at unexpected objects as sources of inspiration. Sharp, metallic surfaces, musical sound waves, industrial details, all that is not normally typical of the sleep environment. We hope that our new collection will inspire you to look for unexpected forms. The kaleidoscope is an improvised freehand drawing, arranged by the principle of sentimental childhood play. Lines are layed in a way, which has an indirect illusion and poses the question of what is aesthetics, art? Unexpected and modern design will complement calm, scandinavian interior.

This design is dedicated to an exceptional, colorful personality. Like Erik Satie music - Stylized classical motifs will appear in your bedroom. Romantic tulip fragments create harmonious chords resembling the spring's warmth. We wanted to create an intrigue by filling a romantic soft colors with a strong gray dominant shade. The contrast between warm and cold colors complements the tulip sketches and highlights the striking temper of the design. If you feel like Your bedroom lacks of charismatic details, this design is a great alternative

The designs have been inspired by watercolors of the most famous Lithuanian aquarellist Ramune Kmieliauskaite. It is a dream-come-true for us to transfer treasured artworks onto textiles bringing the beauty of Ramune's watercolors to the bedroom and convert it to a fabulous piece of interior décor. After a long process of exploring and testing we finally reached the desired results: the best design and long-lasting quality.
